Subject: Product label identification of bisphenol A (BPA)-free products

Dear Valued Customer,

As we have recently informed you, in line with the fact that the raw materials of the products concerned will become bisphenol A (BPA)-free (no intentional inclusion) from 1 December 2023, we will clearly indicate on the product labels that the products are BPA-free for a limited period, taking into consideration the handling of the products by customers during the following period. The labeling details are as follows. We would appreciate your understanding and cooperation.

1. Target product: IWASE EXLON PVC Series

- (1) UL Tubing (AH-3 / AH-6) black and coloured (other than transparent coloured)
- (2) AH105 Tubing black and coloured (other than transparent coloured)
- (3) AH125 Tubing all colours (including flexible types)
- (4) PVC Soft tubing 105C° type all colours (including matte black)
- (5) Other products outside the catalogue (LG-0549 tubing all colours)

2.Switching display implementation period

Limited to one year from 1 December 2023 to 30 November 2024.

*From production after 1 December 2024, after the switchover labelling period, the conventional product labels will be reverted and, even on a shipment basis, all applicable products will be BPA-free products only.

3. Examples of product label identification

From 1 December 2023 to 30 November 2024, Non-BPA will be indicated on the right side of the product label.

[Products containing current BPA (produced until 30 November 2023)]

[BPA-free products (produced from 1 December 2023 until 30 November 2024)]

[Non-BPA labelling discontinued for products produced from 1 December 2024 onwards].

The label image is an image sample and may differ slightly from the actual text placement, size, etc. Above.

Confirm, please.

sincerely yours,

Seiichiro Higo
