**Subject: Switching to bisphenol A-free products**

Dear Valued Customer,

Bisphenol A(BPA), which is contained as an antioxidant in the raw materials used in some of our EXLON-PVC series products, is also designated as a SVHC under the REACH regulations, and we have received notification from the raw material manufacturer that they will switch to BPA-free products. In line with this, we have already evaluated the BPA-free products as having the same performance as the conventional product and confirmed that the product characteristics are not affected at all.

We would like to inform you of the details of the running changeover to BPA-free products on the following dates. We would like to thank you for your kind attention and cooperation.

Yours sincerely,

1. Target product: IWASE EXLON PVC Series

- (1) UL Tubing (AH-3 / AH-6 ) black and coloured (other than transparent coloured)
- (2) AH105 Tubing black and coloured (other than transparent coloured)
- (3) AH125 Tubing all colours (including flexible types)
- (4) PVC Soft tubing 105C° type all colours ( including matte black )
- (5) Other products outside the catalogue (LG-0549 tubing all colours)

2. Switchover schedule: From 1 December 2023 production

3. Other: The product catalogue, product name and product labels remain unchanged, so the identification will be based on the production lot indicated on the product label. If you require environment-related data such as chemSHERPA data, we will to your request as soon as possible.

sincerely yours,

Seiichiro Higo

Manger, Sales Department
