

WASE EXLON Series

To become a company that becomes useful for our customers with tubing.

EXLON Tubing of Iwase is being supported by our customers and used in a variety of applications, such as electric devices, automobile, OA, semiconductor, and physics and chemistry. We are committed to keep working toward improving functions and quality of the product, of course, and our delivery systems, quality management systems, and environmental measures so that our customers can use our products with trust.

We appreciate your continuous support and loyalty to Iwase's EXLON Tubing.

For 300 V **—F— E56036 IWASE AH-3 CSA PVC 105C VW-1**

For 600 V **—F— E56036 IWASE AH-6 CSA PVC 105C VW-1**

EXLON-PVC UL tubing designed for electric insulation are produced based on UL standards and CSA standards and have excellent heat resistance, flame retardant and environmental resistance.

Details of standards that the UL Tubing complies with

Category	UL224	CSA C22.2	Electrical Appliance and Material Safety Act
Certification number	E 56036	LR 33763	—
Temperature rating	105°C		—
Voltage rating	300V (AH-3) • 600V (AH-6)		—
Flame retardant grade	VW-1		-F-

Table of tubing characteristics

Items		Standard value (UL/CSA)	Performance value	Test method and other aspects
Tensile strength (MPa)		10.4 or more	17.0 or more	
Elongation (%)		100 or more	250 or more	
Dielectric withstand voltage		2,500 V 1 minute or more	10,000 V 1 minute or more	
After heat aging	Tensile strength	7.3 MPa or more	15.0 MPa or more	136°C x 7 days
	Elongation	100% or more	200% or more	
	Dielectric withstand voltage	2,500 V 1 minute or more	10,000 V 1 minute or more	
	Copper stability	Elongation 100% or more	Elongation 200% or more	
	Flexibility	No crack or permanent deformation	No abnormality	
Volume resistivity		10 ¹⁰ Ω-cm or more	10 ¹² Ω-cm or more	
Flame retardant		VW-1	VW-1	
Cold bend		No crack	No crack	-30°C x 1 hour
Longitudinal change (%)		±5	4.0 or less	100°C x 2 hours

* The data above are representative values and not guaranteed values.

* Recommended temperature range: -20°C to 105°C

(Product characteristics may not be sufficiently demonstrated depending on the conditions of use or environment. Please feel free to contact us for inquiries on applicability).

EXLON-PVC AH 105 Tubing

Printing on the tubing

AH 105

Characteristics

EXLON-PVC AH105 Tubing is produced using the same materials as EXLON-PVC UL Tubing that complies with Iwase's UL and CSA Standards. These tubing have extremely excellent heat resistance, electric properties, flame retardant, and other performances.

Purposes

- (i) For providing heat resistance, insulation, and protection of wires of electronic and electric devices.
- (ii) For protecting lead wires of transformers, magnet coils, condensers, and other devices.

105°C level

EXLON-PVC Series
EXLON-PVC
J Tubing

Characteristics

EXLON-PVC J Tubing is equivalent of EX PVC1, which complies with the old standard JIS C 2415.

These multipurpose vinyl tubing are designed with a good balance of properties, including electric insulation property, flame retardant, and flexibility.

Purposes

- (i) For providing electric insulation for devices and equipment, such as electronic devices, electric appliances, measuring instruments, and communication devices.
- (ii) For providing mechanical protection for or as identification of electric wires and devices.

Table of tubing characteristics					
Items		Unit	Standard value	Properties value	Test method and other aspects
Tension test	Tensile strength	MPa	10.4 or more	15.0 or more	JIS C 2133
	Elongation	%	100 or more	200 or more

Non-migration Tubing

Non-migratory

90°C level

Self-extinguishing
characteristics

EXLON-PVC Series

EXLON-PVC Soft Tubing

60°C type/105°C type

IWASE

Characteristics

The use of special PVC in the resin provides great flexibility and elasticity. Heat resistant tubing with 105°C level and excellent heat resistance in the high temperature range are also available besides the generation type with 60°C level.

Cold resistance

Cold resistance

Offers excellent cold resistance and suitable for low temperature environments.

Flexibility

Flexibility

Most excellent flexibility among PVC series.
Suitable for piping in tight spaces and corners.

Self-extinguishing
characteristics

Self-extinguishing characteristics

This product has self-extinguishing characteristics.

Self-extinguishing characteristics

EXLON-PVC Series

EXLON-PVC KS Tubing

Normal type / Heat-Resistant type / Soft type

IWASE

Characteristics

PVC tubing that has realized wear resistance and high sliding properties. Heat-resistant types at the 105°C level are available, in addition to the normal types at the 60°C level and soft types.

60°C level

Normal / Soft type

Recommended uses
The highest heat resistant temperature

105°C level

Heat-Resistant type

Recommended uses
The highest heat resistant temperature

High sliding
properties

High sliding properties

Good slide capability and excellent for passing electric wires longer than 1 meter.

Wear resistant

Wear resistant

Offers good wear resistance and perfect for locations where wires contact each other or move.

Table of tubing characteristics

Items		Unit	Normal / Soft type	Heat-Resistant type	Test method and other aspects

IWASE

Printing on the tubing

—F— IWASE NHX-105 F—LINK—NHX VW—1 E90287

Characteristics

This is a completely new type of clean, high flame retardant, highly heat resistant, and flexible elastomer tubing with environmental conservation features.

High flame
retardant

High flame retardancy

In compliance with the UL non-flammability standard VW-1 (UL File No./E90287)

In compliance with the -F- Mark of the Electrical Appliance and Material Safety Act. In compliance with Flammability Test for Railway Stock.

Flexibility

Flexibility

The same level of flexibility as flexible PVC tubing is achieved.

105°C level

105°C level

The polymer has a special cross-linked structure, which enables the heat resistance level of 105°C.

Low smoke
emission

Low smoke emission

This tube has low smoke density and low acidity.
(See the graph above.)

EXLON LINK Tubing

IWASE

Characteristics

These are cross-linked polyethylene tubing developed with Iwase's unique production technologies.

LINK Tubing have the thermal deformation resistance that compares with products with radiation crosslinking while taking advantage of the excellent electric insulation performance of polyethylene.

Varnish
resistance

Varnish resistance

These tubing have excellent chemical resistance (such as against varnishing) to be used as lead wire protection tubing when varnishing is required.

Stress cracking
resistance

Stress cracking resistance

These tubing have excellent resistance against stress-induced fatigue fracture or cracks on materials in comparison to non-cross-linked polyethylene.

90°C level

90°C level

The heat resistance is at the 90°C level.

These tubing have excellent heat resistance, chemical resistance, weather resistance, non-cohesiveness, and electric insulation. These tubing can be used for a variety of purposes, including semiconductor production devices, chemical plants, physiochemical devices, food manufacturing equipment, and medical devices.

**Highly heat resistant**

Highly heat resistant

These tubing are made of PFA resin with the heat resistance which allows continuous uses up to 260°C.

**Chemical resistance**

Chemical resistance

These tubing are resistant to and inactive against most chemicals and solvents.

**Weather resistant**

Weather resistant

They have properties that resist age-dependent changes and deteriorations in harsh outdoor environments.

**Non-cohesive property**

Non-cohesive property

These tubing do not adhere on sticky objects and can be easily peeled off.

**Electric insulation**

Electric insulation

These tubing have excellent electrical properties and the highest insulation resistance in plastic.

EXLON

PFA Micro-Fluoro Resin Tubing

These are extra fine tubing made with the same performance as PFA tubing. These tubing can be used for protecting fine wires exposed to the environment where heat resistance and chemical resistance are required and for wiring of biomedical devices and analytical devices.

Ultra fine

Ultra fine

Sizes with the inner diameter from $\varnothing 0.1$ to $\varnothing 0.5$ are available. These are super extra fine PFA tubing suitable for purposes where advanced precision is required.

Highly heat resistant

Highly heat resistant

These tubing are made of PFA resin with the heat resistance which allows continuous uses up to 260°C.

Chemical resistance

Chemical resistance

These tubing are resistant to and inactive against most chemicals and solvents.

EXLON PFA FLEXIBLE Tubing

Characteristics

Corrugated shapes are created on PFA tubing. The spiral shape of this product prevents getting bent or flattened when folded. These tubing are suitable for wiring in the transportation of chemicals, solvents, and gases, as well as analytical devices and semiconductor devices.

Free pipe
arrangement

Free pipe arrangement

The spiral shapes make the bend radius smaller compared to tubing without spiral shapes.

Highly heat
resistant

Highly heat resistant

These tubing are made of PFA resin with the heat resistance that allows continuous use up to 260°C.

*The processed shape may not be retained in ambient temperatures of 100°C or higher.

Chemical
resistance

Chemical resistance

These tubing are resistant to and inactive against most chemicals and solvents.

EXLON PFA FLEXIBLE Tubing

øA: Outer diameter

12.7 × 9.53	1.585		
19.05 × 15.88	1.585		
25.4 × 22.26	1.57		

- The total lengths can be extended from 100 L to 2000 L depending on tubing sizes.
The standard length at the straight section (C) at both ends is 30L, but we can produce tubing with other length
- We receive orders starting with a single tubing.
- We can produce tubing with other sizes. Please contact us for details.

EXLON PFA COIL Tubing

Characteristics

PFA tubing are curved and formed in a coil shape. These tubing are suitable for pipe arrangements in moving parts of devices and pipe arrangements with undetermined distances.

Expansion and
contraction

Expansion and contraction

The coil shape enables these tubing to be used in moving parts where expansion and contraction are required.

Highly heat
resistant

Highly heat resistant

These tubing are made of PFA resin with the heat resistance which allows continuous uses up to 260°C.

*The processed shape may not be retained in ambient temperatures of 100°C or higher.

Chemical
resistance

Chemical resistance

These tubing are resistant to and inactive against most chemicals and solvents.

EXLON PFA COIL Tubing

øA x øB: Outer diameter x Inner diameter

C: Straight section

øD: Outer diameter of the coil

L1: Total length of the coil

L2: Length of the bonded section of the coil

Standard size chart

Size (øA x øB)	Straight section (C)	Outer diameter of the coil (øD)	Total length of the coil (L1)	Length of the bonded coil (L2)	Number of winding	Range of stretching section (mm)
4×2	100	30	300	100	20	400
6×4	100	40	350	150	20	500
8×6	100	60	400	200	20	600
10×8	100	80	450	250	20	800
12×10	100	150	500	300	20	1,000
3.17×1.59	100	30	300	100	20	400
6.35×4.35	100	40	350	150	20	500
9.53×7.53	100	80	450	250	20	800
12.7×10.7	100	150	500	300	20	1,000

- The standard length of the straight section at both ends is 100L, but we can produce other lengths.
- We receive orders starting with a single tubing.
- We can produce tubing with other sizes. Please contact us for details.
- The coiling work results in 15% to 20% flatness on the contour of the tubing.

EXLON-PFA

Tubing data

Burst pressure

Size (mm)	Burst pressure (MPa)	Size (mm)	Burst pressure (MPa)	Size (mm)	Burst pressure (MPa)
3 × 2	6.3	9 × 8	1.8	3.17 × 1.59	10.3
4 × 2	10.5	10 × 8	3.5	6.35 × 3.96	7.3
4 × 2.5	7.3	10 × 9	1.6	6.35 × 4.35	5.9
4 × 3	4.5	12 × 9	4.5	9.53 × 6.35	6.3
5 × 4	3.5	12 × 10	2.8	9.53 × 7.53	3.7
6 × 4	6.3	16 × 13	3.3	12.7 × 9.53	4.5
6 × 5	2.9	16 × 14	2.1	12.7 × 10.7	2.7
7 × 6	2.4	18 × 16	1.8	19.05 × 15.88	2.8
8 × 6	4.5	19 × 16	2.7	25.4 × 22.26	1.8
8 × 7	2.1	22 × 20	1.5		

- These data are based on the room temperature at 25°C.
- The burst pressure decreases as the operating temperature increases.
- The recommended designed pressure for actual operation (safety pressure) can be obtained by using the safety factor of 3.5 or more for the above burst pressure.
- The data above are representative values and not guaranteed values.

$$\text{Designed pressure for actual operation} = \frac{\text{Burst pressure}}{\text{Safety factor } (\geq 3.5)}$$

Changes in the burst pressure based on temperature (Size 6φ × 4φ)

Temperature	Burst pressure (MPa)
25°C	6.8
50°C	4.9
75°C	3.9
100°C	2.9

- The data above are representative values and not guaranteed values.

Minimum bend radius

Size (mm)	Minimum bend radius (mm)
4 × 2	10
6 × 4	20
8 × 6	30
10 × 8	65
12 × 10	90
6.35 × 3.96	15
9.53 × 6.35	50
12.7 × 9.53	75

- The data above are representative values and not guaranteed values.
